

## Student Survey (4-8)

Age: \_\_\_\_\_

Grade level: \_\_\_\_\_

We need your help! We are studying what kinds of math activities help students to better understand math. Please answer the questions below as best you can by checking true or false after each statement. Please take time to explain your answer.

|  | True | False |
|--|------|-------|
| I learn math best by doing practice problems.<br>Why?  |      |       |
| I am taught math now differently from other ways I have been taught math.<br>How?              |      |       |
| I enjoy working with classmates and friends to do math activities and problem solving.<br>Why? |      |       |
| I feel confident in my abilities to solve math problems.<br>Why?                               |      |       |
| I am given a choice of activities to help me learn math.<br>How?                               |      |       |
| I challenge myself when I choose which math activities I want to do.<br>Why?                   |      |       |

|   | True | False |
|---|------|-------|
| I find math in the books I read.<br>How?                                    |      |       |
| I find math in my social studies classes.<br>How?                           |      |       |
| I find math in my sciences classes.<br>How?                                 |      |       |
| I like to try new things when I come to a new kind of math problem.<br>Why? |      |       |
| I can write an explanation of how I solved a problem in math.<br>Why?       |      |       |
| I can prove my answer is correct in math.<br>Why?                           |      |       |
| I take time to check and see if my answer makes sense.<br>Why?              |      |       |
| I can solve math problems in more ways than one.<br>Why?                    |      |       |
| Other things I would like you to know about how math is going for me:       |      |       |
