

## Writing prompts for issues in math:

- Write about your most memorable math class from your last ( # ) years in school. Describe in detail what happened during the class and why you remember it the most.
- How do you feel about being called upon in math class? Be honest!
- How do you feel about taking math tests? Are you comfortable during the test?
- How do you react on a math test when you think you don't know how to do a problem? When you feel like you are running out of time?
- How do you prepare for a math test?
- From the math test (or math homework) I just returned to you, pick one problem that is not completely correct and write that problem in your math journal. While trying it this time, write down everything you are thinking as you solve it (Solve it/My thoughts T Chart).
- Do wrong answers contribute anything to class discussion and learning in math?
- How do you feel about working by yourself in math? In groups? With a partner?
- Why would you write about you feelings in math class? Why would you write about how you solved a problem in math class?
